

**Airborne Training and Operation in East Europe !**

Fallschirmjaeger Group offers an Airborne Training and jumps with 3 East- European countries, while jump-ships and original parachute systems of the former Sow jet Airborne-Troops are in use. From May, 24th to 28th 2006 we will jump with the **Para Battalion of the Slovakian Army** and the **Polish (PL) 6th Air Assault Brigade** in Dubnica/ **Slovakia (SK)** out of bi-plane AN-2 with steer-able Military- round-canopy-system Cadet (Poland) and OVP-68 (Slovakia).

Additional we will enter **Ukraine (UA)** to train there directly with the **95th Airborne Brigade** out of **helicopter Mi-8/ 17**. In Ukraine we will jump with the famous Russian parachute-system D-6. After exiting the jump-ship the static-line of the D-6 is opening the stabilisation-chute (pilot-chute of around 1m²) which keep the jumper stable in the air, without getting in freefall position. An indescribable feeling for every Western military static-line jumper!

*Exiting: Mi-17↑ AN-2↓*

*Left: Our 2<sup>nd</sup> Chairman Peter Hahn in Russian D-6 gear.*

Please note the metal-grip at the left shoulder. With this grip the jumper himself will start the opening of the main-canopy some seconds after his exit The system itself is secured due to double **automatic activation device (AAD)**. So it will open as well if the jumper is “forgetting” to open the main-canopy by himself by too much enthusiasm.

*Rights: D-6 with stabilisation-chute during exiting an AN-2*

*AN-2 ( biggest Bi-Plane of the world)*

During „Operation Eagle 2006“ we are jumping for the coveted Airborne Wings with certificates of the Slovakian, Polish und Ukrainian Army.

*Mi-17 helicopter*

**Airborne-Wings to gain:**

Army Wings: *SK PL UA UA 95.AbnBde USA*

Most probably we will have an **US- jumpmaster- team** joining the Operation to brief in US parachute equipment, act as jumpmaster and award the **US-Army Airborne Wings** to the participants.

To enter **Ukraine is no visa necessary anymore**. Deadline of registration is **April, 28th 2006**.
